

## Answer Key

- |      |                      |              |      |                          |
|------|----------------------|--------------|------|--------------------------|
| 1A.  | 1B.                  | 1C.          | 2A.  | 2B.                      |
| 1. c | a. renewable         | a. should    | A. 2 | 1. Earth's temperature   |
| 2. a | b. geothermal energy | b. should    | B. 5 | 4. the exhaust fumes     |
| 3. d | c. zero              | c. shouldn't | C. 3 | 6. dangerous             |
| 4. e | d. dependent         | d. should    | D. 1 | 8. toxic chemicals       |
| 5. b | e. wind power        | e. shouldn't | E. 4 | 9. natural habitat       |
|      | f. drill             |              |      | 11. rainforests destroys |
|      |                      |              |      | 13. reduces the oxygen   |
|      |                      |              |      | 15. loud sounds          |

- |                          |   |
|--------------------------|---|
| 3.                       | 4.  |
| 1. Chloe Kim             | 1. We should plant more trees to protect the environment.   |
| 2. Leo Davis             | 2. People shouldn't ignore global warming.                  |
| 3. Mayor Thomas Sterling | 3. People shouldn't hunt animals.                           |
| 4. Dr. Anya Sharma       | 4. We should use renewable energy sources.                  |
|                          | 5. People shouldn't throw rubbish on the ground.            |
|                          | 6. We should use public transportation to reduce pollution. |
|                          | 7. We shouldn't waste water or electricity.                 |
|                          | 8. People shouldn't destroy animal habitats.                |
|                          | 9. We should use eco-friendly products.                     |
|                          | 10. We should recycle paper, plastic, and glass.            |
- 5.
- Global warming is caused by greenhouse gases released from fossil fuels.
  - Climate change, drought, and extreme weather conditions occur.
  - People should use renewable energy sources.

**(T12.8.1)**

- We are seeing extreme weather changes and melting glaciers everywhere. The steady rise in the Earth's temperature, known as global warming, is the result of trapping too much heat in our atmosphere.
- I can hardly breathe when I walk through the city center during rush hour. The exhaust fumes from thousands of cars create terrible air pollution that is dangerous for our lungs and health.
- It is heartbreaking to see the river filled with plastic and toxic chemicals from factories. This water pollution is destroying the natural habitat of fish and making our water sources unsafe to drink.
- Every year, huge areas of rainforests are natural habitat to make space for farms or buildings. This rapid deforestation destroys the homes of countless animals and reduces the oxygen we need to survive.
- Living next to a construction site is a nightmare because of the constant loud sounds. This heavy noise pollution creates so much stress that I can rarely get a good night's sleep.
