

Answer Key

1.

Endangered Animals

Polar bears

Sea turtles

Elephants

Tigers

Habitats

Cold regions

Woodlands

Forests

Oceans

Ways to Save Animals

Reduce pollution

Prevent illegal hunting

Protect natural habitats

Use clean energy

2.

☐ 2. Animal habitats☐ 5. Endangered animals☐ 6. Reasons for extinction☐ 8. Forest destruction☐ 10. Ocean pollution☐ 11. Reasons for hunting

3A.

A. 3

B. 5

C. 2

D. 1

E. 4

3B.

☐ 1. tropical rainforests☐ 4. pet trade☐ 5. illegal hunting☐ 7. climate change☐ 9. marine pollution☐ 11. habitat loss☐ 12. forests and grasslands

4.

People should reduce air and water pollution to protect wildlife in Türkiye.

People should stop marine pollution to save sea animals.

People should protect endangered animals and their natural habitats.

People should support animal shelters to help animals in need.

People should use less electricity to protect nature and wildlife.

5.

1. Because they hide in deep valleys.

2. Wild boars.

3. Pine forests and rocky mountains.

4. Because forests are the leopard's home.

6.

1. ocean

2. water

3. polluted

4. food

5. should

6. shouldn't

7.

1. Whales live in the oceans.

2. They are endangered because of overfishing.

3. We should reduce overfishing and not pollute the sea.

4. Pandas live in bamboo forests.

5. They are endangered because of habitat loss.

6. We should protect bamboo forests and not cut trees in panda habitats.

(T.9.7.1)

Hello and welcome. Today, we look at five animals. They are amazing, but they are in danger.

First, let's go to the tropical rainforests. This is the home of Chimpanzees. They are very smart. But they have big problems. People catch them for the pet trade. Also, illegal hunting is a major threat.

Now, we move to the cold Arctic seas. Here, we see the Polar Bear. They need ice to walk and hunt. Sadly, the ice is melting because of climate change. This makes life very hard for them.

Next, we swim in the oceans and visit sandy beaches. This is where Sea Turtles live. The ocean is not clean anymore. Marine pollution is dangerous. Turtles eat plastic waste by mistake, and they get sick.

Let's look at the Sahara Desert. The Saharan Cheetah lives here. It is very fast. But there are not many left. Humans take their land, so they face habitat loss. Illegal hunting is also a big danger.

Finally, we see the Asian Elephant. They live in forests and grasslands. They are very big, but they have no space. Habitat loss is a serious problem. Hunters also kill them. Illegal hunting stops their numbers from growing. These animals need our help. We must protect their homes.

(T.9.7.2) Sea turtles are fascinating creatures and live in the big ocean. They swim very fast in the water. Although they love eating jellyfish in the water, they come to the sandy beach to lay eggs.

However, sea turtles are in danger now. The ocean is polluted. People throw plastic bags into the water. The turtles think the plastic is food. They eat the plastic and get sick.

We should help the sea turtles. We should keep the beaches clean. We shouldn't throw trash into the sea. Protecting these magnificent animals is imperative.
